TGC LEVEL 1 – AFFILIATE IMPLEMENTATION GUIDE

WHAT'S INSIDE

- Things to Remember
- How to Develop Your Coaching Team
- General Warm-Ups
- Supplemental Class Work
- Linear Programming Examples

Getting Started

Congratulations on completing The Gymnastics Course Level 1 Course! While the accreditation is confirmation that you have been given the knowledge, we also want to make sure you can take this information and implement it into your affiliate, coaching, and your own training.

This step-by-step guide is a framework to bring this information into your coaching and affiliate programs. Regarding your training, keep in mind the following points from TGC L1:

- **Create an isometric base and apply this to the foundations.** Hollow body, Arch, L-sit, Hang in Hollo, and so on. Holding solid foundations will have a profound effect on your development.
- **Use gymnastics in your warm-up.** Frequent exposure creates the strong neurological pathways needed to move dynamically with mastery.
- **Practice gymnastics first.** Practice before your CrossFit workout as the neurological fatigue from the WOD will diminish the ability to hold good shapes.
- **Prioritizing positions rather than intensity.** A 1-minute strict muscle up will transfer to the ability to do many reps kipping, but the inverse cannot be said.
- Finally, remember that **Gymnastics is a great support to your CrossFit training, not a replacement for it.**

Do This First

Bring all of your coaching team up to speed. You will not be able to truly implement the gymnastics coaching concepts taught on TGC without the consistent delivery and application of

standards. For example, if one coach removes bands from pull-ups, yet another allows it, there will be conflict amongst coaches (and members).

The ideal solution is to have all members of the coaching staff attend TGC; however, in many cases, this is not practical. Therefore, we need to educate the remaining coaches. This can be done in various ways; however, beginning with foundational positions, you can work on these over a 6-8 week period:

Coach Team Development

- Week 1 - Hollow, Arch, Hang in Hollow, Hang neutral, Hang Arch, L-sit
- Week 2 - Review above, Hollow and Arch rocks, Beat Swings
- Week 3 - Review above (put them into a warm-up), Strict TTB, Strict Pull-Up
- Week 4 - Review above, Kipping TTB, Kipping Pull-Up, BMU
- Week 5 - Review above, Pistol, Push-Up
- Week 6 - Review above, Ring muscle ups (low rings > strict spotted > kipping)
- Week 7 - Review above, Headstand, and Handstands
- Week 8 - Review above, Handstand push, handstand walking

Class Programming Considerations

Remember that we recommend (for many reasons) using a standardized warm-up. Use the following warm-up (or any of numerous variations) 2-3 times per week to help familiarize your team and your members with these movements. Remember, virtuosity of movement and coaching within the gymnastics warm-up is critical.

Line Drills – 7.5-10m (~20-30 feet).

- Overhead Walking Lunge (Forwards and in reverse)
- Mechanical or Quadruped Bear Crawl
- Gymnastics Bear Crawl
- Duck Walk (optional pending workout)
- Arabesque (with or without rotation)
- Inchworm (with or without push-up)
- Crab Walk

How to Implement This

The following is a guide to introducing these concepts in a class environment, **not a gymnastics program**. This is a very subtle way you can bring exposure to not only your athletes, but to you and your coaching team. This can (and should) be amended to fit in with your class programming.

Again, there are so many ways you can increase exposure and develop your athletes; we could not possibly include them all here. However, many coaches *do* become overwhelmed after the course and struggle to implement what they have learned.

Outlined here are 7 weeks (four days each week) of example supplemental work that can be slotted in at or near the beginning of classes:

Week	Day 1	Day 2	Day 3	Day 4
Week 1	1 Set: Max Hollow Hold 3 sets: 50% of Max Hollow Hold TUT (time under tension)	4 Sets: Arch Holds (15-20sec)	Accumulate: 1:30-2:00 L-Sit (Scaling: tuck, single leg and full)	3 Rounds, 3 sec hold in each position: • Hang in Hollow • Hang In Neutral • Hang in Arch
Week 2	3 Sets: 10 Virtuous Beat Swings	5 Sets: 10 Hollow Rocks	5 Sets: 5 reps of 2 sec chin over bar hold +3s eccentric. Partner spotted as required, remember virtuosity of movement is priority and spot should be used to achieve this.	4 Sets: 5 Strict TTB Use a bench (reduced lever angle) scale as needed
Week 3	3 Sets: 3-5 reps of Strict (with or without spot) or Kipping pull-ups with mastery	3 Sets: 3-5 reps Kipping TTB or Straight Leg Raises	5 Sets: 1 Eccentric Ball Up Most will need a spot here. Focus on quality tuck position and keeping arms straight	3 Sets: 10 Virtuous Beat Swings
Week 4	Accumulate: 2 mins Virtuous Hollow Plank Hold	3 Sets: 10 Perfect Air Squats 5 Sets: 3 Candlestick roll to gymnastics air squat	3 Sets: 5 Virtuous Push-Ups	3 Sets: 6 Pistols Use scales to achieve mastery at current strength and mobility level

Week 5	4 Sets: 10s Ring or dip/parallel bar support hold	4 Sets: 5-10 Ring or dip/parallel bar dips	3 Sets: 3 reps Eccentric Strict Ring Muscle Ups (1 sec pause in all 5 positions)	Headstand Skill Progressions: • Frog Stand • Tuck • Single leg • Full • Full + Virtuous Lean
Week 6	3 Sets: 10 Virtuous ring swings 3 sets: 3 Virtuous ring swing with uprise (spotted)	3 Sets: 5 reps of complex: 2 beat swings + 1 Kipping Pull Up	Skill Development: Pull Overs 3 sets: 5 Jumping Ring or Jumping Bar muscle ups Advanced athletes can add the eccentric decent to ring or bar muscle-ups.	Handstand Skill Work: Wall tension drill Then: HS Skill + Spotting • Hands on Ground, Spotters lift • Hands on Ground, Spotters lift with kick assist • Hands on ground, kick to spotters catch • Hands off ground, compromised lunge kick to spotters
Week 7	3 Sets: 5 Virtuous Push Up 3 Sets: 5 Strict HSPU Scaling: • Pike • Box • Single leg Box • Wall Facing	3 Sets: 5 Strict pull up Use this as an opportunity to teach the toenail spot on a box.	Handstand Weight Transfer Drills: • On knees • In Pike • On box • Wall facing Then: Handstand Walk development via partner spot with fist.	Strict Ring Muscle Up: • Low rings • Partner spotted on high rings • Full Use two spotters on high rings for each athlete

We hope this short guide provides a useful reference. After initially referencing and teaching the strict pull-up work, we recommend sharing this linear progression program with all your members and athletes.

Linear Progression Programming Example

The following Google Sheet is a wonderful example of linear progression programmed around strict pull-up development, and adheres wonderfully to our recommended approach and methodology.
